Table of Contents

About the Author	1
Acknowledgments and Thanks	3
Introduction.....	5
Part I - Getting Started	7
Chapter 1 - Setup and Parts of the Environment.....	9
dQuery – the Startup Program	9
Some Basic Setup.....	9
The dBASE Desktop.....	14
The Title Bar.....	14
The Menu Bar	15
The Tool Bar.....	15
The Navigator Window.....	15
The Command Window	16
The Status Bar	16
Important Tools in dBASE PLUS	17
Speed Menus.....	17
Getting Help	17
Using the Knowledgebase	19
Windows Vista	19
Part II - Data.....	21
Chapter 2 - Table Types	23
Should I Change the Table Level?.....	23
Terminology	24
The dBF Field Types	24
Field Properties.....	25
Null Values	26
Field Names.....	27
Table Language Drivers	27
Indexes	28
Using BLOB Fields.....	30
DBF Table Limits.....	30
Table Design Guidelines.....	30
Identify the Type of Information You Need to Store	31
Break the Information Down	31
Determine The Relationships Among the Tables	31
Making it Possible to “Upsize” to Other Platforms	33

Designing Your Tables and Application Appropriately	33
Chapter 3 - SQL - A Different Language	35
What is SQL, and Why Is It Important?	35
Calculated Fields	39
SQL Joins	40
The WHERE Clause	40
Read Only Queries	40
Other Useful Local SQL Commands	41
Creating a table	41
Add/Remove Fields	41
Deleting a Table	41
Renaming A Table	42
Creating an Index Tag	42
Deleting an Index Tag	42
Adding Data to a Table	42
Update a Set of Data	42
Chapter 4 - Connecting to SQL and Local Databases	45
What Is SQL Data, versus dBASE or “Local” Tables?	45
Database Aliases	45
Making the Connection	46
Start the Data Engine	46
Create the Database Alias	47
Start dBASE	48
Other Data Engines	49
ODBC Drivers	49
In General	50
Creating a Database Alias for Local Tables	50
Part III - Object Oriented Code and dBASE	53
Chapter 5 - Introduction to Objects and dBASE PLUS	55
OOP Concepts and Terminology	55
Working with Simple Objects	57
Creating a form object	57
Creating Objects On A Form	58
Dot Notation	59
Containership	60
Understanding the Object Inspector	60
Understanding Events	61
Windows is Event-Driven	61
What is Event-Driven Programming?	62
dBASE Events	62
Using the dBASE Form To See How This Works	62

Event Handlers	63
Assigning Event Handlers	63
Working With Methods	64
Codeblocks	64
Expression Codeblocks	65
Statement Codeblocks	65
Using Codeblocks as Event Handlers	66
Using Custom Properties and Methods	66
The Object is Built From the Class	66
Parts of a Class	66
The Class Declaration Statement	66
The Class Constructor Code	67
Class Declaration of Methods	68
The ENDCLASS Statement	69
The className and baseClassName Properties	71
Working with Object Reference Variables	72
The dBASE Object Class	72
Types of Classes	73
Stock Classes	73
User-created Custom Classes	73
Building Custom Classes from Scratch	73
General Syntax for Custom Classes	74
Declaring Class Parameters	76
Using Class Hierarchies	77
Using the Scope Resolution Operator	79
Overriding Methods and Events	81
Object Containership	81
The Keyword This	81
The Keyword Form	81
The Keyword CLASS	82
Using Objects as Parameters	84
Making Objects Go Away	84
Multiple References to the Same Object	85
Multiple Instances of the Same Class	86
Protecting Members of a Class	86
Knowing What the Members of a Class Are	88
Chapter 6 - Working with the Data Object Model (OODML).....	91
An Overview	91
Creating and Coding Query Objects	92
How Do I Use a Query?	92
Query Objects and SQL Server Databases	94
Rowset and Field Objects – The Heart of the Data Object Structure	95
Some Basic Information about Rowsets	96
Rowset Events and Event Handlers	96

Navigation In A Rowset	99
Programmatically Stepping Through a Rowset	101
Editing Data In a Rowset	102
Deleting Rows	102
Fields Array and Field Objects	103
Field Class	103
Looping Through All Fields In A Table	104
Other Field Object Events, Methods, etc.	104
OLE, Binary and Memo Fields	105
Creating and Coding Database Objects	105
The Default Database	105
Creating a Database Object Reference	105
Table Maintenance	106
Transaction Processing	106
Using the Index Object(s)	107
More on Expressions	107
Creating and Coding Session Objects	109
The Default Session	110
Creating and Coding Stored Procedure Objects	110
The TableDef Object	110
List Field Information	111
List Index Information	111
The UpdateSet Object	112
Part IV - Data Objects and The Language	113
Chapter 7 - OODML, SQL, and XDMML	115
How To Do Things You May Have Done Before	115
Finding Data	115
Performing Lookups in Other Tables	127
Shortening References	128
Relating Tables	129
Setting a Relationship Between Parent and Child Tables	129
Set Skip	130
Referential Integrity – Adding A Parent to Parent/Child	134
Referential Integrity – Cascading Deletes	135
Child Table Sorted Differently?	136
Calculated Fields	137
Morphing Data	138
More on Data Object Events	140
Query Object - canOpen()	141
Rowset Object – onAppend()	141
Rowset Object – canSave()	142
UpdateSet	143
Copying a Table or Rowset	143
Using Copy() with Calculated Fields	145

Appending Rows From Another Table.....	146
Updating Rows From Another Rowset.....	147
Updating Rows and Adding NEW Rows	148
Deleting Rows.....	149
Chapter 8 - Creating and Working With Data Modules	151
What is a Data Module, and Why Should You Care?	151
Starting dQuery	151
Using dQuery to Create and Modify Data Modules.....	153
Opening an Existing Data Module	156
Examining the Source Code	156
Filtering Data With Conditional Statements.....	158
Adding Calculated Fields.....	160
A More Complex Calculated Field?.....	160
Using Multiple-Table Queries.....	161
Understanding Relationships Among Different Tables	162
Using Multiple Database Queries.....	163
Chapter 9 - Working in a Shared Environment.....	165
Programming for a Shared Environment.....	165
Opening a Table for Exclusive Use.....	166
Opening a Table for Read-Only (RO) Access.....	167
Locking Data.....	168
Implicit Locks	168
Explicit Locks	168
Using the Session Object to Modify Lock Behavior	169
Locking the Rowset.....	171
The _DBASELOCK Field.....	171
Maximum Locks	172
Using Session Objects	172
Adding a Session Object In the Form Designer.....	173
Adding a Session Object to a Data Module	173
The Session Object and Encrypted Tables	174
Locking Related Tables	175
Processing Transactions	175
Drawbacks to Using Transactions.....	175
CacheUpdates.....	176
Working with Non-dBASE Tables	176
Transaction Processing.....	176
Chapter 10 - Security.....	179
The PROTECT Command.....	179
SET ENCRYPTION	183
LOGOUT	183

Security and Paradox Tables.....	183
Security and SQL Server Tables.....	185
The Session Object.....	185
The Database Object.....	185
Application Security.....	185
Part V - Designing the User Interface	187
Chapter 11 - Working With the Designers	189
A Warning.....	189
The Form Designer.....	189
Form Designer Properties.....	192
The Menu Designer.....	193
The Report/Label Designer.....	194
The Table Designer.....	195
The SQL Designer.....	196
The Data Module Designer.....	196
Designer Common Tools.....	196
The Inspector.....	196
The Component Palette.....	199
The Field Palette.....	201
The Format Toolbar.....	202
Chapter 12 - Creating Forms	205
What is a Form?.....	205
Design Concepts.....	205
Types of Forms.....	206
Creating a Form.....	207
Form Metrics.....	208
Add a Text Control.....	209
Saving The Form.....	210
Modifying Properties of the Text Control.....	210
Add a Pushbutton.....	211
Run the Form.....	211
Add An Event Handler.....	212
Modifying .wfm files.....	213
Two-way Tools.....	215
OODML and Forms.....	216
Put Some Fields On The Form.....	216
Interacting With the Data.....	219
Putting Buttons On the Form.....	219
Form Cosmetics.....	235
Multi-Page Forms.....	236

Changing Pages Using a TabBox Control.....	236
Changing Pages Using PushButtons.....	239
Potential Problems.....	241
Running Forms.....	241
Communicating Between Forms.....	242
Passing Data to and Returning Data from A Dialog Form.....	242
It Is Important That You Understand ...	246
What Can This Be Used For?	246
Naming Your Controls.....	247
Tab Order Of Controls.....	247
Some Notes on Tab Order	249
Chapter 13 - Stock Form Controls	253
Windows XP Themes and Other Changes.....	253
Common Properties, Events and Methods.....	257
A Brief Overview of the Stock User-Interface Controls.....	257
Text.....	257
TextLabel.....	259
Entryfield.....	259
Spinbox.....	262
Checkbox.....	264
Radiobutton.....	265
Container.....	268
Notebook.....	269
Editor.....	269
Combobox.....	272
Listbox.....	275
Grid.....	276
Getting Started With A Grid.....	276
Tabbox.....	279
Pushbutton.....	282
Windows XP/Vista, Themes, and Pushbuttons.....	282
Line.....	284
Rectangle.....	284
Image.....	285
Shape.....	285
TreeView and Treeltem.....	285
Progress.....	291
ActiveX.....	293
ReportViewer.....	298
SubForm.....	301

Chapter 14 - Working With The Grid.....	305
Getting Started	305
The Columns Array	306
The Column's editorType Property.....	310
Editable or Not?	313
Editable Grids	313
Non-Editable Grids.....	314
Display Issues	314
Fonts	314
Colors.....	315
Other Grid Appearance Properties.....	316
Changing the Appearance of Individual Columns	317
Enhancing the Grid's Abilities	318
Multiselect Grids	318
Changing Rowset Sort Order	321
Conditional Colors of Cells and Rows	325
The Grid's rowSelect and multiSelect Properties and Colored Cells	327
Coloring a Whole Row	329
Saving and Restoring Column Positions	330
Multi-User?.....	335
Saving/Restoring More Properties Than Shown Here	335
Using Multi Table Rowsets	336
Building A Grid On The Fly	336
Restating Datalinks.....	338
Chapter 15 - Common Properties and Event Handlers of Form	
Controls	341
Common Properties.....	341
Formatting Data – Picture and Function	341
The enabled Property and the when() Event	342
Common Events	343
Event Sequences.....	343
The key() Event.....	346
The onKey() Event.....	346
The onChange() Event.....	347
Using the onLostFocus() Event to Force Navigation and/or Validation.....	347
The onMouseOver() and onMouseOut() Events.....	348
Data Validation	348
Table Designer/Field Level Validation	348
Control-Level Validation	349
Form-Level Validation	351
Record-Level Validation	351
Drag and Drop.....	354
What Else Can Be Done?	357

Chapter 16 - Custom Forms and Custom Form Classes	359
Source Code Aliases vs. Database Aliases, and Why They're Important	359
How To Create A Source Code Alias	360
Using Custom Forms	362
Why Work With Custom Form Classes?	362
Changing Built-in Default Property Values	362
Creating New (Custom) Properties for Custom Form Classes	363
Assigning Default Actions to Event Handlers	363
Creating Methods for a Custom Class	363
Define Default Controls for a Form	363
The Complete Custom Form Class	363
Clearing Out The Custom Form Class	366
A Data Custom Form	367
Placing Custom Forms in Source Alias Folder	370
Using The "Data" Custom Form	371
Creating Classes for Control Objects	374
Why Create Your Own Custom Classes?	375
Methods of Creating and Modifying Custom Classes	375
Creating a Custom TextLabel Class	376
Creating a Custom Entryfield Class	378
Creating a Custom Spinbox Class	379
Creating a Custom Editor Class	379
Creating a Custom Image Class	379
Cleanup of the Custom Class Code	379
Putting These Custom Classes to Work	381
Creating a Custom Pushbutton Class	385
Putting the Custom Pushbutton Classes to Work	390
Modifying the Base Pushbutton Class	392
Using Your Custom Classes For New Forms	393
 Chapter 17 - Using the Custom Classes that Ship with dBASE... 397	
Custom Pushbuttons	397
Custom Controls on the Form Controls Tab	399
Seeker	399
Splitter	401
Animate	405
Calendar	406
Form Viewer	408
 Chapter 18 - Creating Menus, Popup Menus, Speedbars and Toolbars	411
Creating Menus	411
Edit Menu Options	413
Attaching the Menu to a Form	414
Creating an Application Menu	415
Adding A Separator	417

Attaching a Menu to the Application Framewindow.....	417
Form and Rowset References.....	418
Creating Popup (Right-Click) Menus.....	421
The onInitMenu Event.....	423
Attaching a Popup Menu to a Form.....	424
Creating SpeedBars.....	425
Creating Toolbars.....	428
How Do You Design a ToolBar?.....	428
More Source Code Alias Stuff.....	429
Putting Toolbuttons in the Toolbar.....	429
Making The Toolbar More Useful.....	430
Testing Our Toolbar.....	433
Adding Functionality To the ToolBar.....	436
Things to Note.....	440
Toolbars and SDI Forms.....	443
Floating Palettes versus Attached to Form.....	444
Chapter 19 - Reporting and Printing.....	445
Report Objects.....	445
How a Report is Rendered.....	446
The Report Designer.....	447
Metrics.....	448
Creating A Simple Report.....	448
A Quick Look At The Design Surface.....	448
Report Headings.....	449
Adding A Page Number.....	450
Add a Table.....	451
Place Fields On The Report.....	451
Multi-Table Reports.....	455
Start the Report.....	455
Add the Tables.....	456
The detailBand.....	456
The Group Object.....	456
Change the Controlling Rowset.....	457
Summary (Aggregate) Calculations.....	458
Group Report Hints.....	460
Labels.....	462
Custom Label Sizes?.....	465
Printing Reports.....	465
Print from the Preview Window.....	466
Print Using Code.....	466
Create A Preview Form Using a ReportViewer Object.....	467
General Report Designer Hints.....	468
Field Labels.....	468
Alignment Tools.....	468
Lines.....	468

Large Tables.....	469
Navigating In Report Designer.....	469
Null Fields.....	469
Displaying Numeric Values.....	470
Part VI - Programming.....	471
Chapter 20 - Programming in dBASE PLUS.....	473
Using the Source Code Editor.....	473
Setting the Source Code Editor's Default Properties.....	474
Using the Source Editor To Modify Your Forms, Reports, Labels and other Source Code...	475
Getting Started.....	475
Documenting Your Code.....	476
Indenting Your Code.....	478
Creating the Program File.....	479
Testing Programs.....	479
Working with the Command Window.....	480
Entering and Executing Commands.....	480
Pasting Syntax from Help or Other Files.....	481
Functions and Procedures.....	481
Working with Memory Variables.....	483
Codeblocks.....	484
Function Pointers.....	485
The Scope Commands.....	485
Assignment Operators.....	491
Math.....	492
Some Basic Commands.....	493
Controlling Program Flow.....	495
Working with Data Types.....	506
Performing Financial Calculations.....	506
Computing Engineering and Scientific Formulas.....	506
Working with Date Data.....	508
Working with Time Data.....	511
DateTime() And Related Functionality.....	511
Working with Logical Data.....	513
Working with Character Data.....	513
Converting Data Types.....	513
Using Preprocessor Directives.....	514
Using Source Aliases to Manage Your Code.....	516
The SET PROCEDURE Command.....	516
Debugging Your Programs.....	517
Testing Methods, Fixing Program Errors.....	518
Compiling the Code.....	518
Visual Review.....	518
Running Portions of the Application.....	518
Observing Others Running the Application.....	518

Using Code to Trap Errors	519
Shortcuts	521
Built-In Functions and Other Commands	522
Chapter 21 - dBASE's Non-Visual Objects.....	523
Using Arrays	523
How Do I Define An Array?	525
Now You Have Defined The Array, How Do You Put Data In It?	525
Deleting Data in An Array.....	526
Referencing/Displaying Data In An Array.....	529
Sorting The Contents of An Array.....	531
A Couple of dBL Functions That Are Very Useful When Working With Arrays.....	522
Making an Array Larger.....	533
The insert() Method.....	535
Adding Default Values Into An Array – fill()	536
Directory Listings – dir() and dirExt()	537
Storing the Records (or Certain Fields) in a Table Into an Array.....	538
Copying An Array	539
Searching An Array	540
The element() Method.....	541
The subscript() Method	541
Using Arrays With dBASE User Interface Objects	541
Array Size Limits	544
Literal Arrays.....	544
Associative Arrays	544
The Timer Class	546
The File Class.....	548
To Copy a File	548
Rename a File	549
Deleting a File	549
See If a File Exists	549
To Check Attributes of a File	549
Opening or Creating a File.....	550
Looping Through a File	550
Reading From A File	551
Writing To A File	551
The Math Class	555
The Date Class.....	555
Date Math	556
International Issues.....	557
The String Class	558
Methods That Operate on The String.....	558
Methods That Wrap the String in HTML Tags	562
Using the String Object's Methods.....	562
Stacking Methods	563
Strings and Nulls.....	563

Part VII - Working With the Outside World	565
Chapter 22 - OLE and WSH.....	567
Object Linking and Embedding (OLE).....	567
OLE2 Automation Support	567
Communicating with Excel.....	569
Some Fun – The Sound API in Windows	571
Working with OLE Data and Fields	573
Windows Script Host (WSH).....	577
Chapter 23 - The Windows API and DLLs	581
Overview.....	581
The Right Documentation.....	581
Header Files	582
The EXTERN Statement	582
Typical EXTERN Statement	583
Calling Convention	583
Mapping Data Types	584
Data Type Mapping	585
Taking Advantage of Module Aliases	586
Aliasing Function Names	587
Working with Win32 Character-Based Functions.....	588
Dealing with Character Data	589
Data Structures 101.....	590
Using a Simple Data Structure.....	590
Retrieving Data from a Structure	592
Making Structures Easy with OOP.....	593
More About Structures	597
When to EXTERN	598
Placing Data in Structures	599
Part VIII - Putting An Application Together	603
Chapter 24 - Some Application Design Concepts	605
The Application Framework.....	605
_app Properties.....	605
_app.Methods	608
The Application Framewindow	608
The Application Framewindow's Properties and Methods	610
Creating an Application Object	611
SDI vs. MDI Style Applications	619
Menus, Toolbars, Popup Menus – Should You Use Them?	620
Passing Parameters to An Application.....	620

Chapter 25 - Using the Project Explorer.....	633
Starting a New Project.....	623
Project	624
File Details	625
Log	625
DEO	625
Inno	625
Adding Files to The Project.....	625
Creating a “Basic” (Non-DEO) Application	625
Getting Started.....	626
Add Files	627
Start Program.....	629
Finishing Touches	629
Now What?	630
Compiling and Building the Application.....	630
Running the Executable in the Same Folder as the Source	631
Creating a DEO Application.....	631
DEO Folders	632
Selecting the DEO Folder For Each File.....	634
The Application’s INI File.....	635
Compile and Build The Application	636
DEO and NON-DEO?	636
.INI Files	637
Encrypted Tables.....	638
Start Your Application Without the Data Engine.....	639
ActiveX and DLL Controls	639
Manually Handling These In Your Own Code	639
Network Deployment	641
Other Ways to Build Your Executable.....	642
Running a dBASE PLUS Executable	642
Using an Alternate INI File	643
Chapter 26 - The .INI File.....	645
What Exactly Is a .INI File?	645
How Do I Find Things in My .INI File?	645
Examining PLUS.INI.....	646
Custom BDE .CFG File	658
Encrypted Tables	658
Items You Can Add.....	658
No Data Engine	658
Reading/Modifying a .INI File In An Application.....	659
Chapter 27 - Preparing An Application For Deployment	661
Using Inno Setup Manually.....	661

Some Basic Information	662
Inno Constants.....	662
Using Other Languages	663
Creating an Install.....	663
The Types and Components Sections	665
The INI Section	669
The Code Section	670
Borland Database Engine Issues	672
Handling the Registry Settings.....	672
Database Aliases	673
SQL Links Drivers	673
Creating a CD Image.....	673
Using Inno Setup Through the Project Explorer	674
Contacting the Author of Inno Setup.....	675
Manual Deployment – What Files Are Needed?.....	675
Application Files (DEO vs. non-DEO).....	675
Installing the dBASE PLUS Runtime With Your Application.....	676
BDE Files	677
Windows Vista Issues.....	678
Other Issues	678
Part IX - The Internet	679
Chapter 28 - dBASE PLUS On The Web	681
What Is a Web Application?.....	681
Static Web Pages vs. Interactive dBL Applications	682
Automatically Generated Web Applications.....	682
Using the Web Wizards.....	682
The Data Entry Web Wizard	683
The Query and Response Web Wizard	689
The Publish Web Wizard.....	689
Using dQuery's One-Click Web Application	689
Testing Using Apache	690
The Configuration File.....	690
Start Apache	692
Writing Your Own Web Applications	692
The Appendices	695
Appendix 1 - Resources Available	697
Other dBASE Books	700
Appendix 2 - A Brief History of dBASE	701

Appendix 3 - Colors, Images and Graphics in dBASE Applications	705
Colors	705
16-Bit/DOS Color Names	705
JavaScript "Safe Palette" Color Names	705
Hexadecimal BGR Colors	705
Windows Named Colors	706
User Defined Color Name	706
Working With DLL Files	706
Other Ways to Store Images	709
Graphics Issues for Icons and Buttons (Pushbuttons and Toolbuttons)	709
Icons	709
Images for Pushbuttons	710
Images for Toolbuttons	711
An Undocumented Feature	712
Appendix 4 - Borland Database Engine and Table Specifications	713
Differences Between dBASE (DBF) Table Levels	719
Appendix 5 - Undocumented Features	727
Appendix 6 - ANSI Chart	735
Appendix 7 - Windows Application Interface Design and Standards	739
Appendix 8 - Glossary	745
Index	749
